

Dedicated Shift & Holiday Management For Dental Practices

Designed For Dental

Users of our Practice Management System (PMS) often tell us of the frustrations they experience with shift and holiday management, particularly for part-time staff.

'Too time consuming', 'too complicated, 'too much admin' – just a few of the comments we regularly hear, along with 'Is there anything you can do to help make it quicker and easier for us?'

Introducing RotaAngel® - A Dedicated Solution

Many practices still use a paper wall planner or basic spreadsheet system for shift and holiday management. Even the more sophisticated online systems are, in effect, just glorified spreadsheets and are simply not designed to meet the unique needs of a busy dental practice.

That's where RotaAngel® truly delivers. Originally planned to be part of our revolutionary new PMS system, CloudPlus®, we decided instead to offer it as a stand-alone solution available to all dentists, regardless of the PMS they currently use.

RotaAngel® is based on real work areas so everyone can see exactly who is working where and when. It's a fully interactive system that's visual, intuitive and, most importantly, quick and easy to use. And that's just the start of what RotaAngel can do for you and your practice.

Free Beta Version - Sign Up Today!

- View staff shifts by location - who's where and when
- Auto-import Bank Holidays by UK country
- Set up practice or surgery closures, e.g. for maintenance
- Request holidays and shift-swaps - subject to approval
